Top 10 fixes

Prioritized by severity. Issues marked auto-fixable can be patched automatically via AGNT Auto-fix.

CRITICAL · LLMSTXT · AUTO-FIXABLE ~\$300/mo

No /llms.txt file found

Publish /llms.txt at the site root with '# <Project>' + a short summary + H2 sections linking to canonical doc URLs.

CRITICAL · SCHEMA · AUTO-FIXABLE ~\$400/mo

No valid Organization JSON-LD

Add <script type='application/ld+json'> with @type:Organization including name, url, logo, and sameAs (e3 social profiles).

HIGH · CITATIONS ~\$413/mo

Statistical claims are unsourced

Every % / 'X customers' / stat deserves an inline citation link to the origin study or publication.

HIGH · STRUCTURE ~\$325/mo

No FAQ section detected

Add a FAQ block with e5 question/answer pairs using <details>/<summary> or <h3>+<p> patterns. Also mark it up with FAQPage JSON-LD.

HIGH · CITATIONS ~\$413/mo

External links exist but none hit the authoritative allowlist

Cite at least one .edu/.gov, Wikipedia, IETF/W3C spec, or tier-1 publication near your flagship claims.

HIGH · STRUCTURE ~\$325/mo

No definition-lead opener in the first 150 tokens

Open the homepage with '<Brand> is a <category> that <differentiator>' — this is the single biggest lever for AI citability.

HIGH · AGENT_READINESS ~\$500/mo

No API or OpenAPI endpoint detected

Expose a public API reference or OpenAPI document at /docs/api, /openapi.json, or an equivalent developer URL so agents can understand callable surfaces.

LOW · PLATFORM_PROFILES ~\$95/mo

Claude readiness is underdeveloped

Improve the underlying dimensions that drive claude citations: crawlability, structure, schema, freshness, entity clarity, and trust.

LOW · CONTENT_GAPS ~\$160/mo

4 entity page gaps detected

Add explicit entity surfaces: about or company page, team or founder page, pricing page, docs or API page.

LOW · SCHEMA · AUTO-FIXABLE ~\$225/mo

Weak JSON-LD for docs page family

Add page-family schema for TechArticle/Article, BreadcrumbList. Strong JSON-LD should match the page type, not just include generic Organization markup.
