# Top 10 fixes

Prioritized by severity. Issues marked auto-fixable can be patched automatically via AGNT Auto-fix.

CRITICAL · LLMSTXT · AUTO-FIXABLE ~\$300/mo

## No /llms.txt file found

Publish /llms.txt at the site root with '# <Project>' + a short summary + H2 sections linking to canonical doc URLs.

CRITICAL · STRUCTURE ~\$400/mo

## Homepage could not be fetched

Ensure the site serves HTML at the root URL without auth.

HIGH · CRAWLER ~\$1,000/mo

## No robots.txt found

Publish a /robots.txt that explicitly allows GPTBot, ClaudeBot, PerplexityBot, Google-Extended and other AI crawlers.

HIGH · AGENT\_READINESS ~\$500/mo

## No API or OpenAPI endpoint detected

Expose a public API reference or OpenAPI document at /docs/api, /openapi.json, or an equivalent developer URL so agents can understand callable surfaces.

LOW · TRUST\_STACK ~\$95/mo

## Safety trust layer is weak

Strengthen the safety layer before expecting durable AI citations and stable visibility.

LOW · TEMPLATE\_COVERAGE ~\$95/mo

## Template coverage is limited in homepage-only scans

Run Template Audit, Full Site, or Deep Investigation mode to compare key templates across the site.

LOW · CONTENT\_GAPS ~\$160/mo

## 4 entity page gaps detected

Add explicit entity surfaces: about or company page, team or founder page, pricing page, docs or API page.

LOW · PLATFORM\_PROFILES ~\$95/mo

## Perplexity readiness is underdeveloped

Improve the underlying dimensions that drive perplexity citations: crawlability, structure, schema, freshness, entity clarity, and trust.

LOW · AGENT\_READINESS ~\$320/mo

## No x402 payment support detected

If paid agent/API access is supported, document x402 payment flow, supported networks/tokens, payment headers, and facilitator behavior.

LOW · AGENT\_READINESS ~\$320/mo

## No clear agent navigation path detected

Expose a crawlable sitemap and stable navigation to docs, pricing, support, API references, and key task pages. Agents need predictable links, not only app-shell buttons.
